\[ [C(v) - C(w)] \cdot [d(v) - d(w)] = 0 \]

- Direction of bar
- Relative motion of \( v \) w.r.t. \( w \)
- Perpendicular

- Springs ≠ bars
  - but like "weak" bars ~ resting length
  - lets you "feel" the stress

- Tensegrity sculpture
  - Kenneth Snelson
  - Tomohiro Tachi: Freeform Tensegrity
  - George Hart: build your own

- Project discussion
