# 6.851 Advanced Data Structures (Spring'12) <br> Prof. Erik Demaine TAs: Tom Morgan, Justin Zhang 

Problem 9 Due: Thursday, Apr. 26
Be sure to read the instructions on the assignments section of the class web page. Remember to keep your solutions to one page!

Substring matching. Given two strings $S_{1}$ and $S_{2}$, and a positive integer $k$, find the number of substrings of $S_{1}$ of length at least $k$ that occur in $S_{2}$. Develop and analyze an algorithm to solve this problem in $O\left(\left|S_{1}\right|+\left|S_{2}\right|+\operatorname{sort}(\Sigma)\right)$ time.
