Variance of an Indicator

I an indicator with $E[I]=p$:

$$\begin{aligned} \text{Var}[I] &::= E[(I - p)^2] = E[I^2 - 2pI + p^2] \\ &= E[I^2] - 2pE[I] + p^2 \\ &= E[I] - 2p \cdot p + p^2 \\ &= p - 2p^2 + p^2 \\ &= p - p^2 = pq \end{aligned}$$
