# Magic Card Trick, II

Albert R Meyer, April 24, 2013

magictrickII.1

6	9	13	7
12		10	5
3	1	4	14
15	8	11	2

## A Magic Trick

audience chooses 5 cards  
Assistant reveals 4 of them  
Magician announces 5<sup>th</sup> card!

Albert R Meyer, April 24, 2013

magictrickII.2

6	9	13	7
12		10	5
3	1	4	14
15	8	11	2

## Magic Trick Revealed (I)

Among 5 cards chosen:  
at least 2 have the same suit  
(Pigeonhole Principle)

A hides one, lists the other one 1<sup>st</sup>

*Aha! The first card has the same suit as the hidden card!*

Albert R Meyer, April 24, 2013

magictrickII.3

6	9	13	7
12		10	5
3	1	4	14
15	8	11	2

## Magic Trick Revealed (II)

How does M figure out the rank of the hidden card?

*Aha! Look at the order of the other 3 cards!*

Albert R Meyer, April 24, 2013

magictrickII.4

6	9	13	7
12		10	5
3	1	4	14
15	8	11	2

## Magic Trick Revealed (II)

Fix ordering of the deck

$A_{\clubsuit} < A_{\diamondsuit} < A_{\heartsuit} < A_{\spadesuit} <$   
 $2_{\clubsuit} < 2_{\diamondsuit} < 2_{\heartsuit} < 2_{\spadesuit} <$   
 $\vdots$   
 $K_{\clubsuit} < K_{\diamondsuit} < K_{\heartsuit} < K_{\spadesuit}$

Albert R Meyer, April 24, 2013

magictrickII.5

6	9	13	7
12		10	5
3	1	4	14
15	8	11	2

## Magic Trick Revealed (II)

Possible orders for the remaining 3 cards:

{ **SML, SLM, MSL, MLS, LSM, LMS** }

Albert R Meyer, April 24, 2013

magictrickII.6

6	9	13	7
12		10	5
3	1	4	14
15	8	11	2

## Magic Trick Revealed (II)

Wait! Only have **6** sequences of the remaining 3 cards, but **12** possible hidden cards of the known suit!

*Of two cards with the same suit, choosing which to reveal can give 1 more bit of information!  
Aha!*

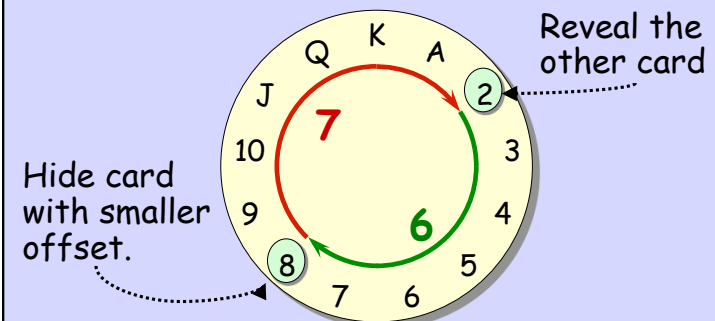

Albert R Meyer, April 24, 2013

magictrickII.7

6	9	13	7
12		10	5
3	1	4	14
15	8	11	2

## Clockwise Distance

The *smaller clockwise distance* between 2 card ranks is at most **6**:

Albert R Meyer, April 24, 2013

magictrickII.8

6	9	13	7
12	10	5	
3	1	4	14
15	8	11	2

## Magic Trick Revealed (Finally)

- The first card determines the hidden suit (♠ ♥ ♦ ♣).
- Hidden rank (A ... K)  
= first-card rank + offset ( $\leq 6$ ).
- Offset given by order of remaining 3 cards:

$$\begin{aligned} \text{SML} &= 1, \text{SLM} = 2, \text{MSL} = 3, \\ \text{MLS} &= 4, \text{LSM} = 5, \text{LMS} = 6. \end{aligned}$$

Albert R Meyer, April 24, 2013

magictrickII.9

6	9	13	7
12	10	5	
3	1	4	14
15	8	11	2

## Example

First: 

Hidden: 

Offset = 1 = SML:

Albert R Meyer, April 24, 2013

magictrickII.10

6	9	13	7
12	10	5	
3	1	4	14
15	8	11	2

**won't** work with 4-card hands

audience  
can pick

$$\binom{52}{4} = 270,725$$

possible 4-card hands

**A** can  
reveal

$$\frac{52!}{49!} = 132,600$$

possible 3-card lists

Albert R Meyer, April 24, 2013

magictrickII.11

6	9	13	7
12	10	5	
3	1	4	14
15	8	11	2

**won't** work with 4 card hands

so at least

$$\left\lceil \frac{270,725}{132,600} \right\rceil = 3$$

hands map to the **same list**  
- **M** can't tell which!

Albert R Meyer, April 24, 2013

magictrickII.12
