Project Pre-proposals

This week you will continue to develop your project proposals as a team. Specifically, through slides your team should communicate progress on the following tasks:

- Form groups of 3, 4, or 5 members and produce a final group roster
- Further develop and refine a single project concept
- Express your group's deliverable(s) in more concrete terms (i.e. what will be your end product(s))

To facilitate final group formation, Proposal Idea slides that were presented by students during lecture 5 (March 11th) have been posted to the course website.

Submission Details:

Pre-proposal slides must be submitted in **PowerPoint** (*.ppt* or *.pptx*) format to the TA (andy@csail.mit.edu) by 12:00 pm on March 18th. This is a firm deadline. Submitting past this point will mean you are unable to present. PowerPoint is freely available to students through MIT: http://ist.mit.edu/powerpoint. Submit all linked video files in addition to your PowerPoint file (this includes all embedded videos from websites).

Optional Assignment:

In addition to the outlined group work, students interested in "completing" work on an individual project, specifically finishing projects started during assignments 3 and 4, for extra credit should do so by April 1st. If the projects are of sufficient quality/scope, they will be considered for the 6.S080 exhibition.
