Since there will be only 2 weeks before the final review after we meet, be prepared to discuss in detail the tasks that remain to complete your project. Please be as specific and realistic as possible as to what you anticipate you will deliver for the review and exhibit.

As always, we encourage bringing any physical production or prototypes that the staff can interact with and discuss. Be sure to let us know any questions/concerns/etc.

Details regarding documentation standards for final project submission will be posted later this week.
